CUTTING DIES

“CLEAR CUT RESULTS”

Cutting Die Repair Cart

The Cart Designed To Handle All Of Your Press Side Repair Needs.

Improving diecutter uptime, requires good tooling and the ability to quickly repair the cutting dies when things go awry. This cart was designed to fit into tight places. Its compact frame allows easy travel between conveyors and machines yet provides just the right amount of storage and work space to handle all of your press side repair needs.

The cart can be customized to fit the different rule selections for your mix of diecutters. Small diameter to standard 66" curved cut, crease and perf rule is easily stored and accessed in slide out drawers. Straight rule is stored compactly underneath. Different rubber sizes and profiles are stored inside compartmentalized drawers to

save time at press side. The cart can be purchased with or without a notcher, cutter and bender pre-mounted or you can easily mount your pre-existing equipment.

No wasted time going back and forth to the repair area. Everything needed to do the repair is taken press side reducing your costly downtime.
